## Enado and P5 Unveil A Revolutionary Integration: FutureNow Two-Way Communication with Enado's Groundbreaking Control

Enado, a game-changer in the world of smart automation, collaborates with P5, an industry stalwart with over two decades of home automation expertise, to introduce the **integration of FutureNow's two-way communication system** with Enado's cutting-edge platform.

"FutureNow, powered by P5, stands at the zenith of modern-day home automation. Its suite includes DIN Rail mountable, multi-channel switches, dimmers, window coverings, and HVAC control modules, ensuring homeowners and businesses receive the pinnacle of innovation and quality.

Combined with Enado's trailblazing, **no-code web-based control application**, the integration ensures an **unparalleled smart automation experience**.

"Enado's mission has always revolved around making state-of-the-art technology accessible. This collaboration with P5 and the integration of FutureNow into our platform is a significant stride in that direction," states Adam Kent, CEO of Enado. **"Our commitment to revolutionizing the way homeowners and businesses interact with technology is unwavering, and this partnership amplifies that dedication."**

P5's FutureNow, with its open communication protocol and software drivers, effortlessly integrates into a myriad of systems, whether they be controllers from renowned manufacturers or unique proprietary designs.

This flexibility is now complemented by Enado's intuitive control, setting a new standard in the automation arena.

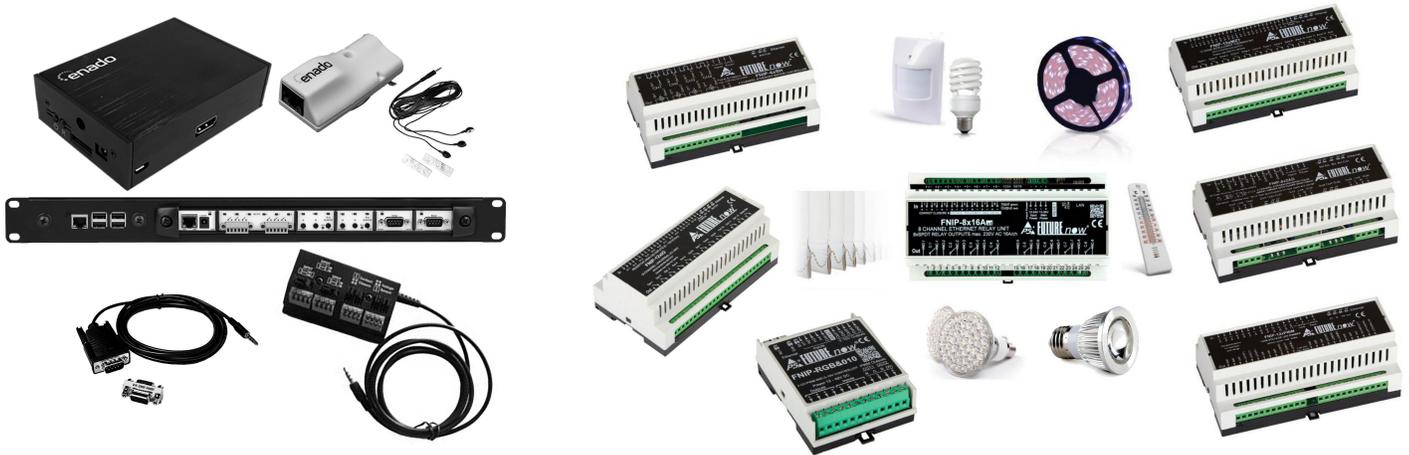

"At P5, innovation and quality are our guiding principles. This partnership with Enado magnifies our shared vision of **delivering superior, yet cost-effective solutions to the world**," remarks Tamas Tarnok, CEO of P5.

For installers, businesses, entertainment venues, MDUs, and homebuilders, this integration means more than just seamless communication.

It's an opportunity to provide their clients with cost-effective control, switching, and dimming solutions, built on uncomplicated, affordable infrastructure and switches.

**The FutureNow drivers and integration are available from today integrated into the Enado V6 platform.**
